Personal statement

As a software developer with bachelor's degree in informatics Engineering. I have a large experience using Java (Android) and JavaScript creating innovated projects for companies or to solve social issues. These social projects give me the courage for help to other guys to learn programming oriented to Web and Mobile in order to resolve issues in our community. I like so much contribute to the community with my work or teaching the technologies I learned or the experience I got in my work.
